

The LIFE SUPERHERO project aims to promote the use of **ventilated permeable roofs (VPR)** as sustainable and cost-effective “**passive cooling**” technology able to increase building occupants’ and cities summer comfort and decrease buildings’ energy and green-house gasses emissions.

Through collaborative effort among producers and their associations, research centers, municipalities, social housing, and tenants, LIFE SUPERHERO aims to overcome existing policy/legislative/awareness barriers to properly spread the adoption of VPR and the “HEROTILE-based roof”. The 4th Newsletter of the LIFE SUPERHERO Project

LIFE SUPERHERO team will be happy to send all contents two times per year, for the next 5 years, to everyone should be interested (to subscribe, [click here!](#)). The aim of this project is to create a LIFE SUPERHERO community, able to share all project updates.

The Newsletter is expected to be the main tool to disseminate the best practices concerning pitched roofs and roof tiles technologies, at the national and international level. The Newsletter will involve contents about *ongoing activities, technical interviews and scientific on-depth analysis* concerning LIFE SUPERHERO Project; it will be published in May and November. All contents will be available via mail, by subscription on [LIFE SUPERHERO Project website](#); on LIFE SUPERHERO [Facebook](#), [Twitter](#) and [LinkedIn](#) homepages.

LIFE SUPERHERO at COP27

LIFE SUPERHERO Project was one of three LIFE projects selected to participate to the side event “Climate is LIFE: Italian project solutions for fighting climate change” organized by NCP LIFE Italy for the 27th United Nations Conference on Climate Change (UNFCCC COP27).
